

From the desk of the Managing Director

Dear Readers,

I am delighted to communicate with you through this new medium, our quarterly newsletter – **Adept@Work**. During the last four years, we have witnessed a quantum leap in the number of customers across the country. With a customer-centric approach, we are rapidly spreading our network to ensure all-time efficient services to our customers. Also, several new developments are taking place in our design, manufacturing and overall operations. These efforts are aimed at serving our customers more efficiently, with the best possible technology.

These developments will certainly help you reap the highest benefits from our offerings. We have initiated this communication platform to reach out to and update you with all such developments.

In this first issue, you will find several interesting developments at Adept. Our number of Flowmeter installations has grown rapidly during the previous financial

year. Meeting the number of installations was as challenging as meeting the size and application requirements. In this issue, read more about India's largest Flowmeter of 2700 mm diameter which we have supplied to Vidarbha Irrigation Development Corporation (VIDC). Recently, we have also been certified with Integrated Management System, making us the first Flowmeter manufacturer in India to achieve this feat. Product development and innovation are continuous processes at Adept. As a result, one of our Flowmeter housing designs has been honoured with the India Design Mark.

I am sure you will enjoy reading this newsletter and knowing more about us.

Sincerely yours,

Vinayak Gadre
Managing Director

In line with the future. Precisely

Largest Flowmeter in India being installed by Adept at VIDC's ambitious project.

Vidarbha Irrigation Development Corporation (VIDC) is an autonomous body under the Government of Maharashtra. It has undertaken an ambitious project to irrigate land in the Vidarbha region and is working on a several kilometres long pipeline under its Mokhabardi project. Adept has supplied three large Flowmeters for this project. The diameter of each of these Flowmeters is 2700 mm, which makes them the largest fully calibrated Flowmeters ever manufactured in India. We are proud of this achievement and our contribution to irrigation sector in India.

2700 mm line size, full bore Electromagnetic Flowmeter

Adept is recognised with Integrated Management System

**ISO 9001 : 2015
ISO 14001 : 2015
BS OHSAS 18001 : 2007
SA 8001:2008**

Recently Adept is certified with ISO 9001:2015, ISO 14001:2015 and BS OHSAS 18001 by TUV NORD, Germany, which is recognised as a prestigious organisation in this field.

The ISO 9001:2015 certification endorses our stringent Quality Management System (QMS).

ISO 14001:2015 specifies the requirements of an Environmental Management System (EMS) to enhance our environmental performance.

BS OHSAS 18001 - Occupational Health and Safety Assessment Series is an internationally applied British standard for occupational health and safety management systems.

Apart from this, Adept is also certified with SA 8001:2008 for Social Accountability Management Compliance.

These certifications are a further testimony to our quality, reliability, concern for the environment and society, and strict adherence to safety practices. **We are proud to be the first Flowmeter manufacturer in India to achieve these certifications.**

They reaffirm your trust in Adept for maintaining the highest standards of manufacturing and business practices. We sincerely thank all our customers for their continuous encouraging support.

New Flowmeter Housing Design attested with India Design Mark. Spells excellence

The new housing design of our Electromagnetic Flowmeter model has been awarded the prestigious India Design Mark jointly by the Ministry of Industries, Government of India and National Institute of Design (NID), India's foremost and premier design institute. The India Design Mark symbolises excellence in form, function, quality, safety, sustainability and innovation. This prestigious award is the result of immense research and design efforts by our team. Adept has invested a considerable amount for the development of this Flowmeter. We are sure you will appreciate the quality and benefits of this new development and provide us an opportunity to serve you, by ordering this model very soon.

Expanding Dealer Network

With the ever growing number of customers and more than 25,000 installations of Flowmeters, we are rapidly expanding our network across the country. This network consists of dealers in major industrial hubs and regional offices in all parts of India.

Adept dealers at strategic locations in India are well-trained and well-equipped. They can assist you with the right advice on the selection of models and quickly provide proposals. Adept stores also stock a few models, so that they can offer ex-stock deliveries and essential spares to service you promptly. All our regional offices are managed by technically qualified and trained teams of engineers for sales and service. Through our vast network, we are sure of providing you with the most reliable pre and post-sales support.

If you are an existing user of Adept Flowmeters, we would like to learn more about your installation. This will be covered in our forthcoming issues.

Do write to us for more information and to let us know how we can serve you better.
